

This title is an excellent, well-illustrated introductory guide to all species and subspecies of gorilla, chimpanzee, orangutan and gibbon, which would also serve as an educational resource. Preliminary sections explain how the apes are related and provide information on biology, ecology, life history, behaviour and physiology. The bulk of the book is devoted to species accounts: 7 species of Great ape in 4 genera and 16 species of Lesser ape in 4 genera. Each species account contains information on appearance, distribution, population size, conservation, breeding biology and ecology. Each account is laid out as a 2-page spread for easy cross-referencing. It is the artwork that makes the book stand out. Ray Hutchins brings his skills as an artist to produce attractive, accurate images of all the species. The title has been endorsed by the Jane Goodall Institute and The Orangutan Foundation.

Star Trek Script Book Becoming Human: The Seven of Nine Saga : Script Book #2, Bros Before Hoes, St. Jude Thaddeus: Helper in Desperate Cases, The Network Inside Out, Hello, Washington DC!, Answers to Your Questions about Sharks, Love For Hire: The Helenas Grove Series Book 2, Multinationals, Technology and Localization in Automotive Firms in Asia, Poetry From The Heart - Love and Other Things,
