

Second in a series of two programs, this CD-ROM is designed to teach users how to effectively manage patient pain in the hospital setting. Pain Management II continues the concepts covered in Pain Management I. Based on content from Margo McCaffery's video tape series McCaffery on Pain and McCaffery: Contemporary Issues in Pain Management. This fully interactive CD-ROM provides a thorough exploration of the nurses active role in opioid administration. The program utilizes realistic graphics, animations, video sequences and engaging learning activities. Continuing education credits are available through completion of a comprehensive exam provided in the program.
